Dr. Slosser is an accomplished researcher, writer, and educator with a focus on legal cognition and AI governance. He has published on, among others: the role of cognitive linguistics in legal interpretation and legal theory; AI and ADM in public administrative and human rights law; and, how agents (human, AI or otherwise) behave under the force of normative constraints. His work has been invited for inclusion on multiple scientific and advisory committees on Law and AI, he has presented his findings to governments, international projects on cognitive legal theory and legal linguistics, interdisciplinary conferences in cognitive science and law, and workshops for PhD schools, among others. Dr. Slosser founded the Sapien Institute in 2025 to explore the tensions between rule-based reasoning and contextual adaptation in both human and AI decision-making processes.
